Crafting the Perfect Pharmacy Research Proposal Example

To illustrate how these components come together, let's review an example research proposal focusing on a pertinent pharmacy issue: "Assessing the Effectiveness of a Pharmacist-Led Medication Management Program in Reducing Hospital Readmissions for Elderly Patients."

Sample Pharmacy Research Proposal Outline

Title

Evaluating the Impact of a Pharmacist-Led Medication Management Program on Hospital Readmission Rates among Elderly Patients

Abstract

This study aims to determine whether implementing a pharmacist-led medication management program can significantly reduce 30-day hospital readmission rates in elderly patients with multiple chronic conditions. Utilizing a randomized controlled trial design over 12 months, the research will compare outcomes between patients receiving standard care and those enrolled in the intervention. Findings could inform policy changes to enhance medication safety and reduce healthcare costs.

Introduction and Background

The aging population presents unique challenges in medication management due to polypharmacy and comorbidities. Hospital readmissions are costly and often preventable, with medication-related issues being a primary contributor. Pharmacists are uniquely positioned to optimize medication regimens, improve

adherence, and identify adverse drug reactions. Previous studies suggest pharmacist-led interventions can improve outcomes, but evidence remains limited regarding their effectiveness in reducing readmissions among the elderly.

Research Objectives and Questions

1. Primary Objective: To evaluate the effect of a pharmacist-led medication management program on 30-day hospital readmission rates in elderly patients.
2. Secondary Objectives: To assess medication adherence, patient satisfaction, and incidence of adverse drug events.
3. Research Questions:
4. Does the intervention reduce the rate of hospital readmissions?
5. How does the program influence medication adherence?
6. What is patient satisfaction with pharmacist-led care?

Methodology

Study Design

A randomized controlled trial (RCT) with two arms: intervention and control.

Population and Sample Size

1. Inclusion: Patients aged 65+ discharged with at least three chronic medications.
2. Exclusion: Patients with terminal illness or cognitive impairment preventing participation.
3. Sample size calculation based on previous data suggests 200

participants per group to detect a 15% reduction in readmission rates with 80% power and 5% significance.

Data Collection Methods

1. Baseline data at discharge.
2. Follow-up calls at 30 days post-discharge.
3. Data on readmissions obtained from hospital records.
4. Medication adherence assessed via validated questionnaires.
5. Patient satisfaction surveyed using standardized tools.

Data Analysis Plan

1. Intention-to-treat analysis.
2. Chi-square tests for readmission rates.
3. T-tests or Mann-Whitney U tests for continuous variables.
4. Logistic regression to adjust for confounders.

Ethical Considerations

1. Informed consent obtained.
2. Approval from institutional review board.
3. Data confidentiality maintained.

Significance and Innovation

This study will provide robust evidence on the effectiveness of pharmacist-led interventions in reducing hospital readmissions among the elderly, potentially influencing policy and practice guidelines. Its innovative aspect lies in integrating comprehensive medication management within a randomized trial framework specific to this high-risk population.

Timeline and Budget

| Phase | Duration | Activities |

||||

| Preparation | Months 1-2 | Protocol development, ethics approval |

| Recruitment | Months 3-8 | Patient enrollment and baseline data collection |

| Intervention | Months 3-12 | Implementation of medication management program |

| Follow-up | Months 4-13 | Data collection at 30 days |

| Data Analysis | Months 14-15 | Statistical analysis, report writing |

Budget estimate: \$50,000 covering personnel, materials, data management, and dissemination.

Legal and safety considerations

When downloading free eBooks, it is essential to ensure that the source is legal and safe.
